

**Premier Brick**

Premier Brick gives you the classic beauty of brick but without the cost. It really does look like the real thing. All you miss is the hassle, mess and long timescales for building that are all too common with expensive brick garages.

It's Compton's innovative design that makes Premier Brick look so authentic. You simply won't see panel joint marks. Years of research and development backed by intensive testing ensures it stands up to the closest scrutiny.

You can choose between two sculptured brick finishes - either red or buff. Standing at 7ft to the eaves, it's ideal for taller vehicles or people who want that feeling of spaciousness. Adding to the prestigious feel are coloured fibre cement roof sheets that come as standard with either brown, terracotta, green or grey options.

Prior to installation a survey will be conducted by a Compton expert and a free maintenance check will occur approximately 12 months later.

It's simple to choose a Premier Brick to suit you. Select your building and roof colour then choose one of four style packages: Cedar, White PVCu, Golden Oak Woodgrain or Rosewood Woodgrain.

Opposite: Premier Brick Red Brick 2.74m (9' 0") wide Cedar package with Terracotta Roof sheets. Above: Premier Brick (Buff finish) 3.05m (10'0") wide with Rosewood wood grain package

## State-of-the-art design.
