Any Compton building can be a Workshop

Unlike timber, a Compton workshop is virtually maintenance-free, isn't going to burn down and is much more secure. Any building featured within our product range can just as easily be supplied and installed as a workshop. Simply make your selection from our range, replacing the main garage door with a personnel door and then you can join the thousands of other satisfied Compton customers choosing to use their building as a workshop.

Sizes:

A range of widths from 2.44 (8'0") to 6.40 (21'0")

Any length from 1.88 (6'2")

A choice of 3 heights: 1.98 (6'6"), 2.13 (7'0") and 2.39 (7'10")

A range of finishes: Spar, Brick or Plain Brick or Rockstone.

Please note:

The standard up and over door will be replaced with a galvanised steel 0.814 (2'8") personnel door, free of charge (except Newbury Spar). Other door options are available including a 1.219 (4'0") galvanised steel door, a 0.814 (2'8") Cedar door, or maintenance-free plastisol coated personnel doors – ask your agent to advise you.

For a totally maintenance-free building specify PVCu fascias on Apex buildings, or plastisol fascias on flat buildings, then choose a PVCu window for years of hassle free workshop use. On the Spar range the building can be lined out when installed – we can provide the means to fix the timber battens for lining. Ensure that you allow for plenty of ventilation by specifying at least one opening window.

(Please refer to page 34-43 for specific size options.)
